To ensure consistency, the 2015 estimates were also updated using 2015 FIES with the new urban-rural classification from the POPCEN 2015.

Coefficient of variation of 2015 provincial poverty incidence among families is greater than 20%.

The increase or decrease of the poverty incidence among families between 2015 and 2018 is significant at 10% level of significance ($\alpha = 0.10$).
